News Notes

In the soaking rain which fell over the week end 3.6 inches were registered, making a total of nearly 4 inches for the month.

Mr. and Mrs. Lyman Redd and family arrived here last week from Los Angeles for a visit with relatives.

John L. Allen, son of Ptes. H. S. Allen, returned last week from Utah where he has attended college since being released from his mission last fall.

July 21 is the date for the big M. I. A. Field Day for this stake. The contests will be held at Magrath.

Fat Lee, jovial proprietor of the Club Cafe returned this week from a three years vacation spent in China.

A farewell party will be held in honor of S. F. Kimball and family, who leave next week for Salt Lake City to make their home, next Tuesday evening in the first Ward chapel. Everyone is cordially invited to attend.

A free air and water service will be found in front of King Motors as soon as installation can be made.

Stampede posters and programs will be off the Recorder press in a day or two.

The Raymond Rustlers, due to their win at Spring Conlee 9-7, and Lethbridge's defeat at Cardston 6-3 last Wednesday, now hold the undisputed leadership of the southern baseball loop.

The baseball game at Magrath with New Dayon, Wednesday, was called in the last half of the ninth on account of darkness. The score was 7-5 in favor of New Dayon, but according to rules the score reverts to the finished eighth, which gave Magrath the game 5-4.

King Motors disposed of four new Fords last Tuesday to: T. L. Halpin, sedan, J. S. Anderson, sedan, Dave Watson touring, and E. P. Tanner, Magrath, sedan. A few days previous a used Ford coupe was sold to Wm. Wiggil of the Merc. staff.

Frank Rolfsen suffered a broken finger last Monday from a foul tip, while catching behind the bat at ball practice. Dr. Aströf rendered medical aid.

Heritage Bros. Big Circus Coming Here

Heritage Brothers Big Three Ring Trained Wild Animals Circus is as much different from its competitors as the hand organ is from grand opera.

Mr. Arthur Heritage, manager of the Heritage Brothers Big Circus, a man of long and varied executive experience in the show world, dreamed for years of a mixed wild animal act—using male and female lions, tigers, leopards, and pumas. Of course, other showmen have had such a dream and after a few half-hearted attempts to make it come true coupled with the loss of valuable animals and a nice bed in a good hospital for the trainers, charged the loss to the experimental department and marked it up as impossible.

Every one visiting Heritage Brothers Circus on Saturday July 3 at Raymond Memorial Ball Park will see a group of this kind in action numbering ten animals. Not only are the animals of different specie, this is the largest act of "cats" ever worked by one man at one time and is only one act of Heritage Brothers Big Show that we delight in referring to as new, trapeze acts, horse acts, elephants, acts perch acts, bear acts, tiger acts, and a host of funny clowns. A band of Sioux Indians and a big street parade at noon. Be sure and see our see our big parade even though business may compel you to miss this huge performance.

News Notes

Band members are requested to be at the Opera house Sunday at 4 o'clock for practice in preparation for Dominion Day.

Monday next is election day. Every elector should vote. Vote the way you wish—but VOTE! Let your conscience be your guide.

The position of secretary-treasurer for the town of Raymond was accepted by Mayor O. H. Snow. There were a half half dozen applications. Mr. Snow's acceptance of this position leaves the job of mayor to be filled.

Advertisers take notice; that the Recorder will be printed one day early next week. Kindly get your ads in by Tuesday noon.

It's the Regular Saving Prices combined with Quality and Service that make our store popular in every community.

University Of Saskatchewan Is Carrying On Valuable Work In Extending Scientific Knowledge

President Walter Murray, at the recent convocation of the University of Saskatchewan announced that the province had decided to use its share of the surplus of Wheat Pool, operated by the Federal Government during the war, to establish an agricultural research foundation. The income from the fund will be some \$12,000 a year, which sum will be administered by a board of trustees for special research in plant and animal diseases, in marketing, and also for scholarships, says the Manitoba Free Press.

This action of the Saskatchewan Legislature is in line with its record as regards research at the University. For several years now an annual grant of \$15,000 has been voted to this end. Acting under this grant, investigations have been carried on in animal diseases and in plant breeding, in house construction, in seeking out types of corn suitable for Southwest Saskatchewan and in chemical and physical researches. Among these latter was an inquiry into the cause of decay in concrete. The work along this line has shown such promise that the Canada Cement Company and the Dominion Research Council have each repeated its grant.

So well has the ceramics department developed that it was announced that a department of geology would be established. Professor Delany, of the University of Manitoba, has accepted the appointment to this department.

Four reports on soil surveys have been issued and two more are in preparation. Evidently these reports have not been allowed to waste their information on the desert air of university files, for the farming interests and the loan companies have petitioned the university authorities that these surveys be accelerated. Perhaps this fact is so significant, as the interest of the Provincial Government in university research, in showing the close accord between the province and the university.

On the university side it will be noted that each of these efforts chronicled has been in direct relationship to Saskatchewan and not concerned with the ravages of the tsetse fly in Africa. True, science should not and cannot know boundaries, but it may be as true science and yet begin at home.

The criticism might be levelled that all of this is applied science and that it is playing the game, the university should also devote a portion of its time, talent and income to increase the world stock of knowledge of pure science. Dr. Murray claims that this phase is not neglected and that moreover the feeling for research has quickened the intellectual life of every department of the university, students and faculty alike. From this quickening, can come the ultimate flower of human achievement, creative work.

Trees On The Prairies

Three and a Half Million Young Trees Shipped This Year From Sutherland

The staff of the Dominion forestry farm at Sutherland, Sask., have been busy shipping baby trees destined to become pleasant groves of shelter in nearly 3,000 places in the Canadian prairie provinces—Manitoba, Saskatchewan and Alberta.

The demand for this free service afforded by the Canadian Government department of agriculture fluctuates with the years, according to farming conditions and settlers' movements. Up to the fall of 1923 the Sutherland station had shipped since its inception, over 17,000,000 trees. For 1924 the total was over 2,000,000, while in 1925 it was about the same number. This year 3,355,000 were shipped.

It Was a Pretty Strike

It was such a pretty strike—everybody happy and tilted ladies cooking sausages for the volunteers, and dukes and marquises running locomotives, and strikers cheering the soldiers and playing football with the bobbies. It does really look as though the English had a sense of humor that we in these United States sometimes lack.—Chicago Tribune.

May Enlarge B.C. Plant

"If the chemical research work of our laboratories regarding utilization of hemlock cellulose is successful, we will double and treble the size of our plant," said Mr. Lawrence Killam, president of the British Columbia Pulp and Paper Company, in an address before the foreign trade bureau of the Board of Trade of Vancouver.

Toms, bats and snakes can live longer without food than any other creatures.

W. N. U. 1633

Marketing Costs

Farmers' Returns From Canadian and New Zealand Cheese

Investigations by the dairy and cold storage branch of the department of agriculture at Ottawa into the making and marketing costs of Canadian and New Zealand cheese, have brought out the fact that the Canadian dairy farmer fares much better than his Anglo-American competitor. While the average price received for Canadian cheese was but little more than one-half cent per pound above New Zealand, the Canadian milk producer received about 11½ per cent more of the selling price in the British market than the New Zealand farmer. In other words, the Canadian farmer who provided the milk for export cheese, received \$3.22 cents for every dollar's worth of his cheese sold in the London quotations, while the New Zealand cowman received only 68.73 cents from each dollar his cheese brought in Great Britain. Mr. J. F. Singleton in his report of the investigation points out that the Canadian cheese producer has in the competition between buyers in Montreal and at country cheese boards, an assurance of good prices which sometimes exceed values justified by the state of the Old Country markets.

Seed Testing Laboratories

Over Fifty Thousand Samples Handled During the Past Year

The seed branch of the Dominion department of agriculture renders an important service in the maintenance of seed testing laboratories at Quebec, Ottawa, Toronto, Winnipeg and Calgary. These laboratories are also equipped for the analysis of underground feeding stuffs. The minister of agriculture in his annual report states that in the year ending March 31, 1925, over forty thousand samples of seed, feeding stuffs and fertilizers were handled by the laboratories. The seed samples are tested for purity and germination. The feeding stuffs and fertilizers are analyzed. Cases of misrepresentation of the composition of these commodities and the clever use of adulterants are exposed in this way. Honest and legitimate trade is protected against unsafe and inferior goods. Largely due to this work by the seed branch the quality of commercial feeding stuffs and fertilizers for sale in Canada is steadily improving.

Prizes For Bacon Type

Special Prize Is Offered For Competition At Brandon Summer Fair

The attention of those interested is drawn to a new class appearing in the prize list of the Brandon summer fair. This is a special offered by Swift Canadian Co., Ltd., called a farmers' competition, in which government institutions are barred, for the best bacon type grade or purebred sow over one year, with at least four of her spring farrowed pigs at her side. These pigs must be sired by a pure-bred bacon type boar.

Furthermore these young pigs may be entered in the group of six (class 82), entered from any recognized Boys' and Girls' Club, if the regulations regarding such entry be observed.

Report Unique Discovery

English Workmen Find Complete Sickle In Heart Of Tree

Many curious objects have been found embedded in trees, but the recent discovery of a sickle is probably unique. This object was found by working men employed in sawmills at Wolverton, England. While engaged in sawing an elm into planks, a complete sickle was found in the heart of the tree. The elm was grown in Bedfordshire and is estimated to be about 90 years old. It is supposed that a woodman left the sickle in the tree some 70 years ago, as that number of annual rings were found outside the sickle.

Had Some Job

Old Timer.—I understand Bill took mechanical engineering. What is he doing now?

Second Old Timer.—He is working for the railroad.

"That so? What doing?"

"Well, you know the man who goes around the cars and taps all the wheels to make sure everything is all right?"

"Yes."

"Well, Bill helps that man listen."

—Iowa Green Gander.

A man seldom likes to meet another man who has a fad for collecting bills.

Canada's Wheat Surplus

Dominion Has Supplanted U.S. As Granary of World

Figures supplied by the latest bulletin of the International Institute of Agriculture at Rome gives the world total of exportable wheat between last August 1 and next July 31 as 735,000,000 bushels. The needs of the importing countries will be satisfied with 625,000,000 bushels. The carry-over, therefore, will be the satisfactory total of 110,000,000 bushels. So far as can be judged in advance of knowledge of what the next yield will be, it is apparent that the price levels are at their maximum for some time.

No longer is the United States the granary of the world. Its wheat crops in the last several years have not been particularly large and the domestic demands annually have subtracted from the exportable surplus. The Institute of agriculture estimates the exports of American wheat at 61,500,000 bushels for the crop year ending next July 31.

That figure leaves the Republic a poor fourth in the list of five leading wheat-exporting countries. Canada leads with the enormous exportable surplus of 311,200,000 bushels. Argentina is next with 181,500,000 bushels, Australia is third with 77,300,000 bushels, and India is fifth with 6,100,000. A total of 94,200,000 bushels is expected to come from all other wheat-growing countries.

Minerals Are Essential

Milk Cows Often Need Building Up After Winter

For the heavy producing cows that have come through the winter in a more or less depleted condition with respect to calcium and phosphorus and where these cows are now going out to pasture, it would seem a wise practice to provide them a mineral supplement, says the Breeder's Gazette. They will need salt anyway. They will not eat steamed bone meal and finely ground limestone unless these are mixed with something of a palatable feed nature or with salt. On pasture a mixture of equal parts steamed bone meal, finely ground limestone, and salt self-fed, should supply everything the cows need, except in those sections where there are losses due to galling. In these sections some potassium iodide should be given. Two grains of potassium iodide per head daily may be mixed with the feed.

Is Almost Too Perfect

Vermont Boy Does Housework As Well As Chores

Donald Brown, 10-year-old son of Mr. and Mrs. Clifton Brown, is an expert in cake and cookie making. He makes all the cakes and cookies for his mother, attends to the baking and does the frosting. He also takes care of his room and does other work about the house, besides doing outdoor chores.

New exhibition buildings are being erected at Ottawa. These will be ready for the World's Poultry Congress in 1927. Floor plans of the buildings are being prepared for distribution to intending exhibitors. Application for these should be made to Ernest Rhoades, Congress Secretary, Experimental Farm, Ottawa.

Some Interesting Facts

Remarkable Progress Made By Canada In Recent Years

In a recent compilation made by R. H. Coats, Canadian Government statistician, the population of Canada is estimated at 9,364,200. In 1901 it was but 5,371,000. Thus, the gain in 25 years has been 75 per cent.

Other interesting facts given in the compilation are: "The number of Canadian homes is 2,001,512, of which 62 per cent. are owned and 38 per cent. rented; the average Canadian family is 4.62; the proportion of men to women is exceedingly high—103 to 100. One may remark of the low amount of crime (2.77 indictable offences per 1,000 population in 1921). On education Canada spends more than \$120,000,000 yearly.

"Next to population among national assets stands natural resources. The basic fact about Canada is that she is half a continent and still a 'new' country. In agriculture, the total arable area is at least 300,000,000 acres, of which less than one-half is occupied and less than one quarter 'improved.'

"Though in population Canada ranks only twenty-fifth among the countries of the world, in import and export trade she ranks sixth. In exports, on a per capita basis, she stands second. Nearly half of the trade of Canada is with the United States."

Arranging Culling Service

Members' of Saskatchewan Poultry Pool Can Weed Out Flocks

The Saskatchewan Egg and Poultry Pool is arranging a culling service which will enable its membership to have their flocks weeded out. The pool is also arranging to market the non-profit hens, culled from the flocks, by making live car shipments from country points. It requires some 2,000 hens to make up a carload. It is intended to make a substantial initial cash payment at the end door, when these culled are delivered for shipping. Where a sufficient number in a district desire this service, the culling experts will be available this summer. The cost per flock will be nominal.

Young Leghorn Won Egg-Laying Contest

Pullet Outdistanced All Older Contestants In P... ..

The younger of the hen species is more prolific than her older sister, according to records of an egg-laying contest just received by the department of commerce from Buenos Aires. A young White Leghorn pullet won the Argentine contest. During eight months she laid 162 eggs.

The best record achieved by hens was by a White Wyandotte, which laid 131 eggs during the eight months. A team of White Leghorn pullets also laid a total of 510 eggs to the best total of 611 by six White Wyandottes among the hens.

Forest Planted By Scouts

No less than 85,000 trees were planted by the Boy Scout troops of New York state last year. About half that number were planted by the Scouts in Pennsylvania. Where the minimum age limit of sixteen years did not interfere, the boys also patrolled the forest and helped fight fires.

Because of the ban on hunting swans in the past ten years, there are more than 15,000 swans in waters along the coast of Maryland, Virginia and North Carolina.

Some Interesting Information Relating To Early Exploration Of The Hudson Bay Area

All Farm Animals

Need Salt Supply

Plays Important Part As Appetizer and Stimulus to Digestion

Experience and science alike have shown that salt is essential to the good health and thrift of farm livestock. It is not a food nor does it directly increase the digestibility of food, but it nevertheless plays an important part in the work of nutrition, writes F. T. Shutt, Dominion chemist. It is chiefly valuable as an appetizer and a substance which makes the feed more palatable; as a stimulant and tonic, when taken in small amounts, and as a source of hydrochloric acid, a normal constituent of the gastric juice. Its use, therefore, leads to larger consumption of food, and, by stimulating digestion, permits the animals to make a larger and more profitable return in flesh or milk production.

Of all farm animals, cows in milk require the largest amount of salt.

Sheep require salt and there should be no neglect in supplying it, either by trough, barrel salt, or rock salt. It should be available to them at all times.

Horses thrive best when regularly supplied by salt, say, about one ounce daily. When hard at work they require more than at rest, for the reason that salt is excreted in the perspiration.

Pigs and poultry require less salt than other farm animals, but it should be supplied regularly. Brood sows should not be without salt, which may be given in box, trough or self-feeder. All stock fed liberally with rich, nutritious feed, exhibit a craving for salt, and this should be met if good health and thrift are to be maintained.

The Weed Menace

Vigorous Prosecution of the Fight Against Weeds In Alberta

More than eighty municipalities were represented at the convention of weed supervisors and inspectors, held at Calgary, Alberta, recently. Thorough discussion of the weed campaign for the summer took place, and indications are for a vigorous prosecution of the fight against the weeds. Excellent co-operation between the various municipalities and the provincial department of agriculture in the campaign and considerable further progress is anticipated this year in clearing the province of the weed menace.

Needed As Much As Cash

The Brantford Examiner notes that young Cornelius Vanderbilt has lost a million and a half dollars trying to establish three newspapers. But to run newspapers more than money alone is required—brains, for example.—Kingston Standard.

Fruit trees should not be sprayed when they are in full bloom, because the poison may kill the honeybees, which play so big a part in pollinating the flowers.

The Victoria Tower, Westminster, London, is the biggest and highest square tower in the world, being 75 feet square and 336 feet high.

Preservation Of Eggs

The "Guarantee" Process For Eggs Stored In A Cellar

The value of the "Guarantee" process for storing eggs, which consists of dipping the eggs in a boiling solution of wax and oil, as demonstrated in an experiment where the eggs were kept in a cellar. Describing the experiment in his latest report the Dominion poultry husbandman states that the "Guaranteed" eggs were in considerably better condition at the end of fifteen weeks than were the non-processed ones. When tested for flavor there was a marked difference in favor of the "Guaranteed" eggs. The non-processed eggs began to have a musty flavor after the tenth week, while the "Guaranteed" new laid eggs were quite palatable, boiled or poached, when taken out at the fifteenth week. It seems, therefore, certain that the process has a decidedly favorable effect on the keeping quality of eggs stored in an ordinary cellar.

Enormous Flower Grows In Sumatra

Measures One Yard Across and Weighs Fifteen Pounds

What is the largest flower you have ever seen? Probably the big yellow sunflower, or maybe the peony. But in tropical countries flowers grow to an enormous size. The children of Sumatra could bring you a flower that measures one yard across, having five large creamy-colored petals as large as dinner plates, and a beautiful centre of purple stamens. You would not want to carry a bunch of these home, for you would find one alone heavy enough to carry, a fully developed flower weighing fifteen pounds. Just fancy, a bud of this remarkable flower looks like a brown cabbage.

Was Not Interested

The waiter was taking the order of a pretty girl who was accompanied by a florid, portly, middle-aged man.

"And how about the lobster," the waiter inquired.

"Oh, he can order whatever he likes," came the startling reply.

Marquis wheat, now grown on 20,000,000 acres of land, all comes from a single head produced in 1897 by hybridization.

It is probable, also, that one ant feels vastly more important in the scheme of things than another.

C.P.R. President Leaves for England and Continent

E. W. Beatty, chairman and president of the Canadian Pacific Railway, left Windsor Station, Montreal, for Quebec recently where he boarded the Empress of Scotland for England and the continent. The trip is largely of a business nature and will cover a period of some weeks. While in England Mr. Beatty will complete arrangements for the building of the company's two new ocean liners for the Atlantic routes.

A large number of Canadian Pacific directors and officers were on the Windsor Station platform to say goodbye to Mr. Beatty and W. R. McNamee, vice-president of traffic, who accompanied him on his trip. Those included in the group were Sir Herbert Holt, E. W. Nelson, Russ McMaster, F. E. Meredith, K.C., A. D. McTier, vice-president; J. J. Scully, general manager; W. A. Watkinson, assistant to the chairman Canadian Pacific Steamships; Ernest Alexander, secretary; W. M. Neal, assistant to the vice-president; J. K. Savage, general superintendent; C. E. E. Usher, general passenger traffic manager; E. de B. Panet; W. Naughton; W. G. Annable; Wm. Ballantyne and Capt. J. T. Walsh.

Left to right above are shown: W. R. McNamee; F. E. Meredith, K.C., director Canadian Pacific Steamships; and President Beatty.

WORLD HAPPENINGS
BRIEFLY TOLD

The bill approving the new trade agreement between Canada and the West Indies was given third reading in the house at Ottawa.

The National Assembly at Ankara, the Turkish capital, has ratified the treaty between Great Britain and Turkey settling the dispute over Mosul.

Julius Miller, of Michigan City, Indiana, lost his right eye when a passing automobile dived from the road and a nail which penetrated Miller's skull.

A. C. Ferguson, K.C., of Winnipeg, was unanimously elected president of the Manitoba Bar Association, at the annual meeting in Winnipeg.

The Rumanian Government has ordered five submarines from Italy. Italy is also completing the reconstruction and refitting two Italian built torpedo boat destroyers for Rumania.

The first commercial shipment of seed potatoes from British Columbia to California went forward recently, consisting of 60 tons of Burbank certified seed.

It has been officially announced by the grain division of the Vancouver Merchants' Exchange that no further quotations on cash grain would be issued until September 1.

Three years absent from its native cave a homing pigeon recently returned to England. It was lost in Mar-ennes, France, July 10, 1922. This is considered a remarkable feat of bird memory.

Senator Dandurand, government leader, replying to a question in the senate, said the government intended to appoint a minister plenipotentiary to Washington. As to whether the appointment would be made this session was under consideration.

There were more than 10,000 casualties, 1,564 of which were fatal, in Prussian mines in 1925, according to information given out by the Prussian ministry of trade. Eighty-five per cent. of the casualties occurred in the Ruhr district.

Premier Brind of France has asked the League of Nations to make counterfeiting an international crime. Brind's action was taken as a result of the recent Hungarian counterfeiting plot, which caused Europe to be flooded with false bank notes.

Liquor laden vessels would not be allowed to go into Canadian ports for repairs or any similar pretext if the Customs Act is amended to include a recommendation made before the custom probe by W. F. Wilson, chief of the customs preventive service for Canada.

A Birthday Gift

Canada Returns to the Two Cent Postage Rate

On and after July 1 it will cost only two cents to send a letter from one part of Canada to another or to the United States and Mexico. At present the letter rate in Canada and to points in the United States and Mexico is three cents per ounce, one cent of which is war tax, that was imposed on April 1, 1925. The removal of the one cent war tax and the return to the more popular two cent rate, the same as is in effect in the United States, was provided for in the Canadian budget recently submitted to the Canadian Parliament by Hon. James A. Robb, minister of finance and now approved.

It is expected that the return of the two cent postage will cause a big increase in postal business in Canada not only in the urban centres, but in the farming districts served by 3,772 rural mail routes with about 210,000 boxes on them.

The Canadian public regard this reduction in the letter postage rate as a birthday gift from the government, as next July 1 will be the 50th anniversary of Confederation, when Canada became a self-governing and united Dominion.

British To Control

Marconi Company

Only Small Percentage of Issued Share Capital Held By Foreigners

At an extraordinary meeting the Marconi Telegraph Company agreed to an alteration of its articles of association whereby the company will remain under British control and not more than 25 per cent. of the issued share capital will be held under foreign control. Only natural born Britons will be eligible as directors or officers in the United Kingdom or the British dominions.

The trouble with a great many young men who want to see life is that they imagine none of it is worth seeing by daylight.

The woman who runs after a husband until she gets one seldom brags of her catch.

W. N. U. 1633

Symbol Of Armed Force

German Military Uniforms Seen At Peace Conference

German military uniforms were the only military uniforms visible at the conference table at Geneva when experts under the auspices of the League of Nations began their official discussions on May 18 at Geneva, Switzerland. The one great nation theoretically already disarmed, Germany was the one nation to appear with the symbol of armed forces. That incident graphically explains the reason why the voluntary disarmament of nations in Europe is extremely difficult.

It is not armament that makes a nation dangerous, but an armed mind. The fact that Germany has been forced to destroy most of her weapons of war and to disband her great military machine does not make her neighbors safe if she thinks in terms of arms and armies. Of all the problems before those experts at Geneva, the chief is that of finding a way to secure moral disarmament.

To Preserve Niagara's Beauty

Scenic Beauty Of Niagara Falls Is To Be Safeguarded

Constitution is under way of a joint committee representing Canada and the United States to discuss:

(1)—Preservation of the scenic beauty of Niagara Falls.

(2)—The quantity of water which may be further diverted from the Niagara River without interfering with the beauty of the falls.

Canadian representatives on the committee are Col. O. M. Biegar, Ottawa; J. G. Johnston, chief of the water powers branch, department of the interior, Ottawa; and Dr. C. F. Cammell, deputy minister of mines, Ottawa. Names of the United States representatives on the committee have not yet been received.

Not Coming To Canada This Year

Prince of Wales Not Visiting Ranch Says Calgary's Mayor

The Prince of Wales will not visit Calgary and his ranch for some time, and probably not this year, according to Mayor G. H. Webster, who had an audience with the Prince at St. James' Palace when he was in England recently.

According to the mayor, the prince was greatly interested in conditions here and asked a number of questions about Canada.

Attractively Simple

An interesting return to the modes for the younger generation, is that of the old-time and delightful chafin. A practical frock for the little miss from 2 to 8 years is pictured here, fashioned from chafin. The dress is so simple it can be made in a few hours. The sleeves have raglan shoulders, and the neck has gathers at both front and back, and may be finished with a round collar as illustrated, or a narrow band. An attractive touch of color is given to the front by two rows of colored thread, run in long and short-stitch from the neck to the outer edge of the tabs, which simulate pockets. The bloomers are gathered into bands at the knees and waist. No. 1308 is in sizes 2, 4, 6 and 8 years. Size 4 years requires 2 1/2 yards 32-inch material for complete dress. Price 20 cents.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dress-maker. Price of the book 10 cents the copy.

Claims Discovery Of
Long Sought Secret

Chemist Announces Creation of Life By Artificial Means

The claim of John F. Mazur, chemist, that he had succeeded in creating plant and animal life by artificial means has excited widespread, if skeptical, interest.

Mazur has cautioned reporters against a sensational exposition of his work which might prejudice scientists against him. He sincerely believes that he has discovered the long-sought secret of life.

He has been working five years on spontaneous creation of life. He is not disturbed by the refusal of Prof. Francis H. Herrick, head of the biology department of Western Reserve University at Cleveland, to take any stock in his discovery.

"If he got life," Prof. Herrick has said, "it simply came from apparatus already contaminated by life. Invariably this has been the case every time claims of producing life from inanimate matter have been made."

"I don't blame Prof. Herrick for scoffing," says Mazur. "I would have scoffed five years ago. But I can convince any reasonable man. If reputable scientists will apply the same logic to my work that they apply to their own, they will admit that I have created living organisms from inanimate matter."

Laboratory tests for Mazur are being arranged by science teachers at the Lordin high school.

Cancer Without Operation

Cautious Treatment Recommended By a Lending British Authority On This Disease

"It is a strange thing that concerning almost every 'cure' for cancer which has been advanced by either the medical profession, or by the greatest quack or impostor that ever existed, if that so-called 'cure' could be shown in any way to benefit a case of cancer, or in any way to modify the course of the disease favorably, or even be suspected of prolonging life, that on examination, it will be found that, if the drug or nostrum which is lauded be carefully examined and looked into, potencies, in varying quantities and proportions, will be found to unwittingly form one of the main constituents of such drug or nostrum. Take for instance, the so-called 'violet-leaf cure,' or the 'willow-infusion cure' of cancer. These two 'cures' are made by procuring violet leaves and willow bark, and holding them down and then drinking the water in which they were boiled. Willow bark and willow leaves have been treated in the same manner, and the water in which they have been boiled has been drunk with the assertion that cases of cancer have been known to benefit. The above claims, put forward for both 'cures,' have been supported by members of the profession on many occasions."

"Every quack nostrum prepared by the infusion of any herbs can be shown to contain, all of them, one common product of nature present in all vegetable life—potassium salts. "No method of treatment yet practised by the 'ultra-orthodox' among the members of the medical profession but can be shown scientifically to owe its method of action to influencing directly or indirectly the potassium economy, and perhaps, also the economy of the earthy salts of the body."

"There are many in the medical profession who will at once refuse to listen to or attempt any form of treatment other than that recognized and smiled on by the 'experts' in cancer, or rather cancer as it has hitherto existed and been treated."

"There are those in the profession who will attempt the treatment at the earnest request and pressure of a dying man or woman, and only half-heartedly carry it out."

"There are those in the profession who are of an introspective and pessimistic turn of mind who will start by saying it is no good, will honestly believe it is no good, and will ultimately prove themselves to be quite right."

"There are those who take a delight in proving everyone else but themselves to be quite wrong."

"There are those in the profession who, with the best of intentions and otherwise, spend their time in eagerly misrepresenting affairs and other persons."

"There are others, very many, whose name is legion, who will strive hard, and worry, and fret, and eagerly watch, and become over-anxious, and earnestly try and give the method a fair and just application, not trial."

The late Dr. F. W. Forbes Ross, M.D., Edin., F.R.C.S., Eng., D.P.H., Lond., Civil Surgeon His Majesty's Guards' Hospital, London, and for more than 20 years practising in London as a recognized cancer authority, was the discoverer of what is now known as the cancerous treatment of cancer. The above quotations are taken from his book, "Cancer: The Problem of Its Genesis and Treatment," and in view of the fact that, out of all the many Canadian and American sufferers to whom I freely sent home treatment directions before the press generously published them, I have yet to hear from the first who has not been benefited, I suggest that all who are stricken with this terrible disease of the blood will do well if they satisfy themselves as to which of the above classes, ably defined by Dr. Forbes Ross, their own doctor belongs. By so doing, many a sufferer may avert the antiquated and unsatisfactory methods of treatment in vogue prior to the doctor's priceless discovery. Charles Walter, 51 Brunswick Avenue, Toronto, Canada.

ON THE AIR

What Is Doing in the World of Radio

One advantage in having the sermon over the radio is that the preacher can't spot you if you go to sleep.

A woman moved recently from her old home at Marion, Ohio, saying that the locality and neighbors were fine, but that there was too much static to get anything over the radio.

Six broadcasting stations located outside of the metropolitan area of New York city have their studios in the city. The programmes are sent out by remote control.

England's famous train which makes a daily run at 226.5 miles at the rate of 77 miles an hour without a stop during the entire trip, is now equipped with radio for the entertainment of passengers.

Although Mr. Edison assures us that the world needs no more inventions, we think there is a market for some device which will tell the recipient of a radio photograph just how the sender really looks.

Arthur Goyette, of Cambridge, Mass., is totally blind, but he is able to derive entertainment and education from his radio set. He can "read" the dials with his fingertips and has become so expert at tuning that he has no difficulty receiving distant stations when he desires to hear them.

It is said that on one of the first occasions of broadcasting a church service in Winnipeg, Dr. Leslie Pidgeon was preaching from his own pulpit in Augustine Church. He had followed his usual custom of placing his watch on the desk before him. Shortly after the sermon was started an usher cautiously made his way up to the preacher with a card containing a message that had come in from a town several miles out: "Tell the preacher to put his watch in his pocket. It sounds like an alarm clock, and we can't hear the sermon."

Canada's Blind Are Profitably Employed

Good Work Being Done By Canadian National Institute

Learning the construction of many household articles, Canada's blind are now entering profitable employment in their own homes and in the factories of the Canadian National Institute of the Blind, says Captain E. A. Baker, M.C., Dominion secretary of the institute.

Broom, basket and apron making is being done by the thousands of blind workers under the wing of the institute, and the products are being disposed of for their quality and price, said the captain, who is himself blind. "Telling of the management of the institute, Captain Baker said that Canada was divided into districts each with its own board of management. Prominent men in public and private life are to be found on these boards, said the captain.

To Explore Ungava

Quebec Government Will Explore Territory By Use Of Planes

What is considered a most important expedition sent out by the Quebec Government will leave shortly for a long exploration trip in the vast territory of Ungava. The whole expedition trip will be accomplished in three aeroplanes. The principal aim of the expedition is the preparation of a detailed report on McLean's Falls, considered the largest falls in Canada, 800 feet in height and three-quarters of a mile wide. More than 1,000 miles will be covered by the explorers during the four months' they are expected to be absent.

Many Deaths From Appendicitis

Out of 400,000 Cases Last Year 25,000 Did Not Recover

The number of appendicitis cases operated on in the United States and Canada during 1925 was greater than any other single type of abdominal surgery, Dr. LeGrand Guerry, of Columbia, S.C., told members of the American Surgical Association at their meeting in the Hotel Statler, Detroit. Over 400,000 cases of appendicitis were reported, Dr. Guerry said, from which 25,000 deaths resulted.

Sets Glider Record

Ferdinand Schulz, the noted German glider pilot, has established a new world two-passenger glider duration record, remaining in the air 9 hours, 21 minutes and 53 seconds with a student pilot. Schulz held the previous record of 5 hours and 43 minutes.

What is bothering some of the extreme feminine agitators is that even in emancipation there is a man.

Practice makes perfect and the neighbors feel like snatching the piano.

OUR CROSSWORD PUZZLE

- Horizontal
- 1—Polynesian native of New Zealand.
2—Wild animal (pl.).
3—Great plains in South America.
4—Umbrella-like flower clusters.
5—Eastern state (abbr).
6—A short poem.
7—Scout pronoun.
8—Lyric poem.
9—British nobles.
10—Confusion.
11—Tendency.
12—Girl's name.
13—An open space.
14—Terminated.
15—Obtain the advantage in a contest.
16—Precious stone.
17—A weed.
18—Man's name.
19—Not fresh.
20—Stem of tall grass.
- Vertical
- 1—A young girl.
2—Part of verb "to be."
3—Poetical form of open.
4—A contest.
5—The Mohammedan religion.
6—A wind instrument.
7—Australian birds.
8—Man's name.
- 38—An outfit.
39—Land measure (pl.).
40—Central state (abbr.).
41—Weary.
42—Rested.
43—A road (abbr.).
44—An aeroplane control.
45—Prefix denoting from.
46—Paradise.
47—A text book.
48—Accomplishments.
49—A shaded walk.
- 9—Regarding.
10—Moves easily.
11—Search.
12—Emble.
13—Spoken.
14—Gifted.
15—Oredule.
16—Lukewarm.
17—An artery.
18—Man's name.
19—Part of verb "to be."
20—Hibernians.
21—Leased.
22—Fulher.
23—A commander.
24—Compound of ether.
25—Furnaces for baking bricks.
26—The earth.
27—Knotted.
28—One who performs.
29—Salutation.
30—To catch.
31—A diphthong.
32—To act.

SUNDAY SCHOOL LESSON

JUNE 20

JUDAH'S PLEA

Golden Text: A broken and a contrite heart, O God, thou wilt not despise. Psalm 51:17.

Lesson: Genesis 44:18-45.

Devotional Reading: Psalm 51:8-14.

Explanations and Comments

Joseph is Accused of Stealing

Historical Background. Joseph has laid a skillful trap as a final test of his brothers. They have left the city behind and are headed toward home, rejoicing that they have with them corn enough for all, and thinking no doubt of how interested their father will be in hearing about their dinner with the great governor of Egypt. Suddenly Joseph's steward overtakes them and by his first words plunges them into the blackest despair. "Wherefore have ye rewarded evil for good?" he begins, and then accuses them of taking his master's silver cup, the one whereby he divineth.

The brothers protest their innocence, referring to their honesty in returning the money found in their sacks on their previous journey, and declaring that the thief, if thief there be among them, shall be put to death and the rest of them become slaves. The steward offers easier terms: the thief alone shall be his master's slave. They are kept in harrowing suspense as the steward passes from the oldest down, examining sack after sack. They are feeling safe when Benjamin's sack is reached. And then consternation takes the place of exultation. The presence of the cup in Benjamin's sack, like that of the money in all their sacks before, cannot be explained. Is there a supernatural agency at work bringing them to account for their evil past?

"We can picture what would have happened had the ten men been of the same temper displayed at Dothan. But the distance in space from Dothan to Egypt was exceeded by the distance they had traversed in moral advance. They do not stop for recrimination nor for discussion—they act promptly as one man. They rend their cloths and load every man his ass and return to the city" (Dr. C. K. Brown).

Amundsen May Return Home Through Canada

Route Chosen Say Officials of Oslo Aero Club

Officials of the Aero Club at Oslo, declared they have received word from their countryman, Roald Amundsen, to the effect that he and the party which he led in the recent flight over the North Pole in the dirigible Norge, will return to their homes via Canada. Amundsen, together with other members of the dirigible crew, will likely travel by steamer from Alaska down to British Columbia if the information to the Aero Club is correct.

Department Stores Merge

Merger of 20 department stores located in as many cities and towns of Ontario has rumored some time ago has become an accomplished fact according to the Financial Post. It is stated that \$9,000,000 is involved in the transaction and that the annual turnover of the interests merged amounts to \$10,000,000 a year.

Answer to Last Week's Puzzle

England's Problems

The Dole System a Matter That Requires Serious Attention

England has at last come to understand that it is not only labor that has been subsisting on a dole, but industry, too. The Lloyd-Georgian philosophy of the hand-out has spread its poison throughout English activity. As there is no source of revenue but the people, this is a case of the cow trying to live upon her own milk—and it cannot be done. England is sometimes slow to see the fact, but does not evade it once seen. But surely never in her history has she been confronted with problems requiring complete abandonment of adopted policy as she now is. Her course with regard to present problems will be of as momentous consequence to her as was the war.—Dearborn Independent.

Our National Defence

More Attention Should Be Given To Air Force

Our present system of keeping expenditure on national defence in three watertight compartments—water, earth and air—is extravagant and inefficient in a high degree. If all three forms of national defence were correlated, as they ought to be, we should not only spend less, but should get far better value. If, as may well be the case, the power which brings safety has passed from the water to the air, it may lead to national suicide to lavish our money on sea force.—London Spectator.

Wheat Pool For Ontario

Discussion regarding the possibility of the formation of an Ontario wheat pool backed by the United Farmers Co-operative Company and the United Farmers general organization is taking place in agrarian circles, according to the Toronto Star. U.F.O. locals are being canvassed with the idea of getting opinions regarding the feasibility of the project, the newspaper states.

Medical Service For Eskimos

Medical service will be supplied by the Canadian Government to Eskimos in the Canadian Arctic, and where new trading posts of any importance were set up among the Canadian Eskimos, Royal Canadian Mounted Police posts would be established. It was stated by government spokesmen in answer to questions in the house.

British Prime Minister Makes Strong Appeal For Industrial Peace

Chilpenham, Eng.—The prime minister, Stanley Baldwin, speaking before a great gathering of Conservatives here Saturday on "Our Present Discontents," devoted himself chiefly to the industrial unrest and the recent general strike.

Of the coal strike now in progress, the premier declared that a settlement must be reached before long in order to check the decline of the nation's purchasing power.

Mr. Baldwin failed to throw light on any possible action by the government, however, to bring the mining controversy to an end, but his speech proved to be an interesting revelation of his mind on industrial conflicts.

It was a strong appeal for bringing into the realm of industry the spirit of arbitration and conciliation, which the world was seeking to invoke in the settlement of international disputes.

While trying to reconcile labor and capital, the premier wanted to see the British labor movement free from alien and foreign heresy. The Trades Union Congress, he asserted, had fought shy, in the recent general strike, of the red international, only to surrender itself to the Amsterdam international, where it played second fiddle to Germany's lead.

Though he admitted that a general strike for some time or other was inevitable, he was emphatic in declaring: "Our people are not going to throw over parliament to set up the divine right either of the capitalist or of the trade unionist. We are not going to bow down to the dictatorship of either."

Great Britain, because the British race was not a raw and untamed race, kept its head, true to its finest traditions, during the general strike, and by keeping its head "had won the admiration, the reluctant admiration, of the whole people."

Nevertheless, he added, "such an event was of sinister portent in a land which prides itself above all things upon its peaceful and orderly development."

Suggest Co-operation To Stop Smuggling

Matter Discussed at Conference Between Canadian and U. S. Officials

Ottawa.—Closer co-operation between the Canadian and United States Governments in regard to smuggling was under discussion at a conference here between Lincoln C. Andrews, United States assistant secretary of the treasury, in charge of the American prohibition and customs department, Harry C. Whitehall, collector of customs for Vermont, and Hon. G. H. Bolyard, minister of customs for Canada. No announcement of the actual matters discussed was made.

Amundsen to Visit Vancouver

Vancouver.—Raold Amundsen, leader of the successful trip across the North Pole from Spitzbergen to Nome, will be a visitor here before the end of June. Word to this effect has been received by C. J. Bjorke, Norwegian consul here, in reply to an invitation tendered by Mayor L. D. Taylor.

Moscow.—Unable to obtain long-term credits from German banks, Russia has cancelled part of the orders placed with German firms and transferred them to other countries.

Farmers Have Right To Specify Elevators When Shipping Grain

Ottawa.—The Campbell bill to give grain shippers the right to specify the terminal elevators to which their grain should be shipped, passed final stages of the House of Commons after about an hour's discussion.

The only amendment made was one by J. G. Ross (Liberal, Moose Jaw) which included Moose Jaw in the list of order points.

Hon. J. A. Robb announced that after consultation with the board of grain commissioners the government had decided to make Moose Jaw a grain inspection point.

During the discussion, W. W. Kennedy (Conservative, Winnipeg South Central), said that members of the wheat pool put forward the claim that they, the grain growers, had the right to gather their grain into country warehouses and ship that identical

Killed By Senate

Old Age Pension Bill Defeated In Upper Chamber

Ottawa, Ont.—The senate threw out the old age pension bill by a vote of 46 to 21.

The defeat of the bill came on the second reading, which had been moved by Senator Dandurand, Government leader. In the vote, Senator Robertson, former minister of labor, was the only Conservative to support the bill. Sir Allen Aylesworth, Senators J. J. Hughes, and Senator Turfitt, all from the government side of the house, voted with the Conservatives against the bill.

Senator W. B. Ross, Opposition leader, said that he believed the government had no constitutional right to invade provincial jurisdiction over such matters as old age pensions.

The bill constituted a discrimination against the maritime provinces because they were unable to participate in the financial proposals of the bill. Senator Belcourt said it would be unfair to deprive some provinces of the advantage of the scheme because others could not take it up.

Senator Beaubien said Quebec opposed the bill.

Senator J. D. Reid said that only one out of the nine provinces had expressed a willingness to participate in the scheme. It should have been dealt with by a conference of premiers before introduction.

Senator Dandurand, Government leader, in moving second reading of the bill, urged that it was a measure of relief for poor working people.

Want Germany In League

Leaders Anxious to Settle Membership Question In September

Geneva.—To get Germany into the League of Nations at the September meeting at all costs appears now to be the definite programme of the league leaders.

If necessary, a special session of the council will be convened, calling the summer in order to render impossible any repetition of the March fiasco when the Reich statesmen were unable to return to Berlin without being elected to membership.

This means that if Spain and Brazil continue their present policy, which is termed here as "sulking," they probably will be jettisoned by the main powers, work of re-organizing the council proceeding without them.

Murdered In China

Shanghai, China.—Mrs. W. E. Sibley, wife of a Canadian Methodist missionary at Jingshen, Sze Chuan province, was murdered in the streets of Chengtu, in the same province, according to a message from the latter place.

Murderer of Lady Missionary Killed

Peking.—The Chinese coolie who murdered Mrs. W. E. Sibley, a Canadian missionary's wife, has himself been killed, reports received here state. The murderer was wounded by soldiers and died soon after.

Austrian Situation Excellent

Geneva.—The sub-committee for Austria on the council of the League of Nations has voted that the league's financial control over Austria should terminate on June 30 as the situation in that country was excellent.

Aid For British Miners

Funds Being Sent By Organized Workers Throughout the World

London.—The miners on strike are being helped very generously by all organized workers throughout the world. Russia is giving a quarter of a day's wage per week to the relief fund. It has already sent £400,000. The United States labor men have sent £10,000; Germany, £5,000.

These are only the first instalments. France and Belgium are also contributing. Many funds have been started in Britain and one fund called the Women's Fund, has raised £200,000 so far. Tag days will be held all over the country and it is hoped to raise £500,000 a week from all sources.

The miners' families are going on very short rations, but their children are not allowed to suffer hunger, for besides other forms of relief there is that which is provided by the education and poor law authorities.

Certain newspapers are creating an alarm about money received from Russia, which is doubtless sent with propagandist intentions, but as the Prince of Wales himself has contributed to the miners' relief it is hardly possible for the government to deprive the miners of the assistance they are receiving from sympathizers abroad, whether in Russia or any other country.

These large contributions from overseas do not help only miners, they create a demand for sterling and thus strengthen the sterling exchange at a time when, owing to a stoppage of coal export, some strengthening is needed. Meanwhile there is no sign of an early settlement of the dispute. The miners refuse to consider any reduction in wages or a lengthening of hours.

Hauling Gravel On Hudson's Bay Line

Two Trains Distributing It Along Right Of Way

The Pas, Man.—A steam shovel has started operation on the Hudson's Bay Railway.

It is located at a gravel pit about five miles south of the town. This pit was recently purchased by the Canadian National Railway, which is taking steps to acquire the land adjoining, which contains a large quantity of gravel. Two trains are working out of this pit, distributing gravel along the right of way. It is expected that another shovel will be put in commission very shortly.

Hold Royal Court

Nearly Nine Hundred Guests Presented to King and Queen at Buckingham Palace

London.—Plumed, bejewelled and groomed in gossamer court gowns of dazzling beauty, women of social and political prominence were presented to King George and Queen Mary at Buckingham Palace at the first of the season's royal courts.

The King and Queen entertained nearly nine hundred guests, mostly drawn from official diplomatic circles, as is the custom for the first court. About a third of those attending were debutantes and older women who were ushered into the presence of royalty for the first time.

Negotiations Completed

Liverpool.—It is understood that the negotiations for the sale of the White Star Line have been completed, excepting minor details, and all arrangements are being made to transfer the line to British interests early in July.

Motor Van Kills British General

London.—Brigadier-General Edward A. Plunkett, veteran of many wars, was knocked down by a motor van while crossing Piccadilly. He died on the way to the hospital.

Tariff Advisory Board

Manufacturers' Association Expresses Faith That Proper Stand Will Be Taken

Toronto.—Confidence that the new tariff advisory board would deal fairly with the problems which it will be called upon to face, keeping in mind a broad Canadian attitude in their discussions, was expressed by various speakers at the annual meeting of the Canadian Manufacturers' Association.

President J. H. Fortier, Quebec, said: "I think, gentlemen, that when you take your cases to that commission, you will be well received. I have all faith that as Canadians they will take a proper stand."

Regarding the relation of the manufacturers to the rest of the country, the speaker said: "What we want is to show ourselves in a proper light to other classes in the country. Our case is their case; their case is ours. If we could bridge over the gap that appears to exist we would have accomplished something worth while for the good of Canada."

Hon. E. J. Davis, Newmarket, declared that co-operation was evident in Canada today and therefore suggested a Canadian development committee, composed of men of broad vision to meet representatives of farmers and other classes to discuss matters of interest to all. In this way an excellent condition of affairs could be brought about.

B.C. Sawmill Burned

Big Blaze Throws Two Hundred Men Out of Work

Merritt, B.C.—Two hundred men are out of work in this town in Nicola Valley in the interior of British Columbia as the result of a fire which destroyed the sawmill of the Nicola Pine Lumber Company, one of the largest mills in the province, with a resultant loss estimated at \$200,000.

Several of the employees were rescued from the blazing building only with great difficulty and the whole town for a time was threatened by the embers which were carried for long distances by a heavy wind.

Heroic efforts of the fire fighters resulted in the planing mill, drying kilns and millions of feet of lumber in the adjacent yard to the sawmill being saved, despite the fact that the wind was blowing in that direction.

Higher Production Of Registered Seed

Decided Increase Shown In 1925 Over Former Years

Ottawa.—Canadian production of registered seed of the principal field crops in 1925 shows a material increase over former years according to figures just released by Peter Stewart, secretary of the Canadian Seed Growers' Association. Wheat, barley and sweet clover made the greatest gains, the increases over the previous year being 40,000 bushels, 8,000 bushels and 7,000 bushels respectively.

There is a growing demand from many lands for samples and quotations for Canadian registered seed, which seems to point to possibilities for a flourishing export trade within the near future.

Sentenced to Hang

Winnipeg.—Sentence of death was passed on Daniel Prociw for the murder of Annie Cardno, an old-time sweetheart, in Winnipeg, March 16 last. The execution was fixed for August 25. Prociw was removed when sentence was pronounced.

Economic Commission

Berlin.—An economic commission is to investigate Germany's capacity for production in all lines and her marketing facilities at home and abroad. The new body will begin its investigations immediately.

The Special Committee Investigating Customs Has Concluded Sitzings

Prime Minister Of Hungary Assaulted

Struck In Face When Leaving League of Nations' Headquarters

Geneva.—Count Stefan Bethlen, Hungarian premier, was struck in the face by a Hungarian as he was passing through the lobby of the League of Nations headquarters. His assailant was arrested.

As the man was taken out by detectives he told the correspondent he had assaulted Count Bethlen because he did not properly represent Hungary. He wished, he said, to give a public demonstration of Bethlen's unworthiness. The assailant is supposed to be Ivan de Jush, secretary-general of the Hungarian Republican party. After striking Count Bethlen with his hand, he threw a manifesto into the air, signed by de Jush and giving a Paris address.

Sees Market In South

Robert Forke Tells East of Wealth Produced in Western Canada

Renfrew, Ont.—Robert Forke, leader of the Progressives in the House of Commons, addressing the Rotary Club here, said Canadians do not realize the country is changed as much as it has since the days of Macdonald and Mackenzie. Touching on the wealth produced in the prairie provinces last year, \$900,000,000, he turned to the remark of the president of the United States recently that in the near future the United States would be the largest importer of agricultural products in the world.

"We should look to this great market to the south," said Mr. Forke. He declared he was not afraid of United States capital coming into the country, but he feared "mass production."

Withdraws Motion

On Egg Grading

Question Will Be Referred To Committee Of Agriculture

Ottawa.—A motion introduced in the house by Hon. Hugh Guthrie (Conservative, South Wellington), which stated that "in the opinion of this house" the system of egg grading which came into force April 1, 1924, imposed a hardship upon farmers engaged in egg production, was withdrawn, after Hon. W. R. Motherwell, minister of agriculture, had agreed to refer the question to the committee of agriculture.

Economic Need Of Canada Is For More People To Settle On Vacant Lands

Toronto.—"Canada's economic need is for more people. We need more producers and more consumers. The policies which give us both are the policies which produce prosperity, and prosperity will give us national unity. If we can have widespread prosperity we shall have little of the need for national unity or national harmony."

These were the closing words of Right Hon. Sir Thomas White, former Dominion minister of finance, in an address delivered at the closing session of the annual meeting of the Canadian Manufacturers' Association here.

Ottawa.—The parliamentary committee investigating the administration of the department of customs and excise has concluded its public sittings. The committee will meet again but the sittings will be private for the purpose of considering the report to be made to the House of Commons.

It is understood that the committee council have condensed the voluminous evidence which has been taken during the many sittings held into such a form that it can be handled with reasonable dispatch by the committee in preparing the report.

The committee has been sitting for over four months, has examined hundreds of witnesses and delved into numerous reports on firms engaged in various Canadian industries. Its activities have revealed an extended system of commercial smuggling in silks, alcohol, automobiles and other commodities across the international boundary line.

The final sensation in the investigation came when some of the distillers were charged with having contributed to campaign funds. This allegation was made by A. E. Nash, committee auditor. He said that in auditing the books of some of the distillers, amounts had been found for which no explanation had been given. Distillery officials had denied that such money was used to corrupt customs or other government employees, but admitted money had been used, in part, for campaign funds.

The final sensation in the investigation came when some of the distillers were charged with having contributed to campaign funds.

This allegation was made by A. E. Nash, committee auditor.

He said that in auditing the books of some of the distillers, amounts had been found for which no explanation had been given.

Distillery officials had denied that such money was used to corrupt customs or other government employees, but admitted money had been used, in part, for campaign funds.

This allegation was made by A. E. Nash, committee auditor.

He said that in auditing the books of some of the distillers, amounts had been found for which no explanation had been given.

Distillery officials had denied that such money was used to corrupt customs or other government employees, but admitted money had been used, in part, for campaign funds.

The final sensation in the investigation came when some of the distillers were charged with having contributed to campaign funds.

This allegation was made by A. E. Nash, committee auditor.

Across Canada in Eighty Hours

When the Canadian Pacific special mail train came to a stop at the C.P.R. depot at Vancouver, at exactly 5:28 p.m. Thursday, May 6, after its journey across Canada from Quebec, it established a record which, according to officials of the company, will stand for some time. The trip was made from Quebec in three and a third days, the run from Winnipeg taking 32 hours and 6 minutes, 24 hours faster than the through passenger trains, and three hours faster than the speedy silk trains, the fastest trains crossing the continent. The photo above shows the train on its arrival at Vancouver with the Old Country mails for the Aurang. The transfer of the mails to the boat took only twelve minutes. Indicating the resourcefulness of the C.P.R., an executive of the company had agreed to get the mails to Vancouver by 7:00 p.m. on May 6. The train came in an hour ahead of time.

Hay Fever

This Trouble Is Becoming More Common in Prairie Provinces

June is the time of year when the first attack of hay fever occurs. Hay fever is caused by wind-blown pollen. Grasses, ragweeds and pigweeds are the three wind-blown pollens in greatest abundance and hence the principal causes of hay fever. Other pollens may cause hay fever, but they are not so common and not so readily blown. Ragweeds and pigweeds produce tassels of pollen like corn tassels at the top, and the grasses are so common and so early that they are the principal cause of early hay fever, and the ragweeds and pigweeds, the cause of late or autumn hay fever. The first frost of autumn usually gives hay fever patients immediate relief because it freezes the pollen.

According to Prof. V. W. Jackson, Dept. of Botany, Man. Agric. College, the extended area of cultivation and the concomitant spread of grass and weeds has made hay fever a more common illness than formerly, and the present movement of city residents towards suburban districts has made a noticeable increase in hay fever. Perhaps 10 per cent. of the people are sensitive to certain proteins such as contained in pollen grains, and thus poisoned by them. Nature tries to throw off the pollen by sneezing and mucous excretion; but at the cause is continually renewed by the wind-blown pollen, Nature's effort is a continuous annoyance known as hay fever.

Relief may be obtained in three ways: (1) by getting away from the cause; (2) by nasal spray to nullify the poison; (3) by emunctory treatment with pollen extracts to produce a relative immunity.

To get away from the cause one must be at least two miles from hay or grasses, ragweeds or pigweeds, and even prairie sage and wind-fertilized trees such as pines, poplars, oaks and elms, which sometimes cause an early hay fever. The grasses are worst in June and July, and the ragweeds worst in August. It is impossible to escape on the prairies where these things are so common. Only a water journey or a vacation in the Lake of the Woods would give relief.

The centres of large cities seem to be comparatively free from hay fever pollen, and one indication is that they are free from it. The pollen is blown away from the city and settles in the surrounding country.

Gravels this trouble. Tiny nostril screens are now sold to arrest the wind-blown pollen, but these may be more irritating than hay fever, and a fine veil might give better protection from wind-blown pollen. Intense heat or light aggravates the attack, and the patient should rest in cool, dark rooms and use colored glasses as bright light irritates the eye.

Nasal spray might be used to nullify the irritation and give some immediate relief. Weak antiseptic solutions of boric acid, salicylic, or from compound or adrenalin ointment are frequently used. A teaspoonful of Eber's Balsam in a pint of boiling water and inhale the fumes will give temporary relief.

Armistice Car Without Home

Attempts to Establish it as Official Monument Are Unsuccessful

The historic private Pullman car in which Marshal Foch and the German plenipotentiaries signed the armistice in the Forest of Compiègne has again been denied a home after many unsuccessful attempts within the last seven years properly to establish the car as an official monument of the war.

The municipality of Compiègne recently threw up plans for a permanent house in which to maintain the car as a relic of the war, and its estimated cost was 140,000 francs. Unable to pay all of this, the town asked the state for 100,000 francs, only to be refused.

The minister of war replied that the state could not assume any expense in this connection. Since the conservation of the famous car is beyond the modest purse of this little town, the municipal council has just decided that the project must be abandoned.

Sheep Ranchers Come To Canada

Several sheep raisers from the United States have recently made extensive purchases of land in the Interior of British Columbia. Sheep raising on a large scale will be conducted in territory previously considered suitable only to the cattle industry.

The Sweetest Words

A group of newspaper writers were discussing what are the three sweetest words in the English language. One of them suggested "Home, Sweet Home." Another suggested, "I Love You." A third contended, "Enclosed Find Check" and with unanimous approval.—New York Evening World.

Seaweed is used in Sweden for making parkings.

Manitoba Bees Are Busy

Honey Production Shows Wonderful Development in Few Years

Wonderful growth in the production of honey in Manitoba is reported, not only in quantity but in quality as well.

Honey production has for several years been a profitable industry in Ontario and Quebec, but recent years have seen a splendid development also in the three prairie provinces. In Manitoba, according to the department of agriculture, production has increased during the last five years from 907,000 pounds to 4,107,000 pounds, and further increase is confidently anticipated. In Saskatchewan and Alberta too, according to the Dominion apiculturist, they are now keenly alive to the possibilities in this direction, there being a steady increase in the number of beekeepers in these two provinces.

It is hardly an exaggeration to say that our honey resources are practically inexhaustible. From coast to coast there is an abundance of nectar-secreting flowers and plants whose ambrosial crop is wasted because there are not enough bees to harvest it.

In order to further stimulate bee culture and beekeeping, the Dominion experimental farms system has established some twenty or more experimental apiaries throughout the country.

Finds Garden Sufficient

Real Gardener Stays There and Bothers No One

Gardeners are like poets. In that they are impractical fellows who value their souls above their stomachs, but that need trouble no one, because a man who owns a garden usually stays in it and bothers nobody. The song is hackneyed and threadbare by repetition, yet in a time when ideals go wandering, bewildered, through a maze of billboards, gasoline stations, dance halls and hot dog carts there is still some occasion to sing it lustily, out back among the sweet pea vines and the geraniums. "Thank God for a garden," Providence Journal.

In a western city there is a sign reading as follows:

"Of 4,076 who died from effects of gas, 39 initiated it, 37 put a lighted match to it, 4,090 stepped on it."

Judge. Why did you kick the horse?

Accused.—Because he called me a mule!

Americans In Western Canada

Recent Census Expected to Show Increase in Number of Americans Living Here

When the census of the three Canadian prairie provinces—Manitoba, Saskatchewan and Alberta—which is now being taken is completed, it will show that there are over 250,000 American-born residents there.

According to the Dominion census taken in 1921 the three prairie provinces had a population of 1,956,082, of whom 209,140 gave the United States as their birthplace. Since then official records show that over 43,000 Americans have taken up residence between Winnipeg and the Rocky Mountains.

To take the census of Manitoba, Saskatchewan and Alberta required the services of 2,500 enumerators. They covered an area of 758,817 square miles, which is equal in size to the combined area of ten of the largest states in the United States.

Though the census of the whole of Canada is only taken every ten years, a special act of the Canadian Federal Government requires a census of the prairie provinces to be taken every five years. This census, in addition to enumerating the population in detail, will embrace the fullest possible particulars concerning agriculture, the basic industry of the three provinces and also of all Canada.

This year's census will make an appraisal of the 100,000,000 acres of farm lands awaiting settlement in the three prairie provinces which are now valued on an average at \$15 to \$20 an acre.

Willing To Oblige

Scotchman Would Grant Favor But There Were Conditions

Morris Harvey, one of the English principals in "The Merry World," says that the Scotchmen in this country are much more obliging than they are in England. Harvey has just taken a home in Jersey for the summer. Last Sunday he asked his neighbor, a Scotchman, for the use of his lawn mower for the afternoon.

"Certainly," said the obliging neighbor, "I'll give you the use of the lawn mower for the afternoon. But be sure and not take it off my lawn."—New York Evening World.

A Condition Always

But few men are brave enough to allow a mind reader to expose their thoughts in the presence of friends.

Claims Wrangel Island

Nome Trading Co. States They Purchased Rights From Stefansson. Carl Lomen, of Nome, Alaska, announced that the Lomen Helndeer and Trading Company of Nome, including himself and Ralph Lomen, his brother, had filed claim to Wrangel Island with the state department in Washington, D.C.

Any immediate action to substantiate the claim, which he would like to press because Arctic aerial expeditions (his summer have) demonstrated the value of the island as an aviation station, is impossible, stated Lomen. This is because Russia and the United States are without diplomatic relations.

Rights to the island, Lomen announced, were purchased by his company in May, 1924, from Vilhjalmur Stefansson, Canadian explorer.

Stefansson organized an expedition of four men, led by Alan Crawford, of Toronto, that went to the island in 1921.

The island is 75 miles long and 35 wide, lying 110 miles north of Siberia and 300 west of Bering Sea.

Reason For Old Custom

Primitive Man Originated Habit That Has Become Handshake

We have always been told that there is a reason for every rule in the books of etiquette.

Do you know why we shake hands?

In early days man lived alone save for his woman back in the cave. He fought the wild animals alone and dragged home his loot alone. Men warred on one another for the most part. When primitive man was too weary to fight he would drop his club upon meeting another man in his path and hold out his empty hand to show that he was unarmed. And the extended hand warmed into the handshake, then the handshake.

Today's form says that a person coming into a group does not offer to shake hands. It is up to the members of the group to make him welcome by offering the hand. If they care to.

Bought Napoleon's Cocked Hat

One of Napoleon's famous cocked hats has been sold at auction for 43,000 francs. The purchaser is the Prince of Monaco. The hat was brought back from a campaign by the emperor's chief veterinary surgeon, Giraud, as a souvenir.

Perfect Drivers Are The Greatest Menace

So Absolutely and Recklessly Right That Other Drivers Fear Them

The mediocre automobile driver must save the traffic situation in cities today says a traffic expert.

The inferior and the perfect drivers are causing all the difficulties and are responsible for accidents and traffic tie-ups.

It is not difficult to understand how the inferior driver causes accidents to his own and other machines, but the "perfect" driver appears too perfect to be blamed.

The "perfect" driver never gets into an accident himself. He never violates a traffic rule. He never gives vociferous traffic cops a chance to enjoy themselves at his expense.

The "perfect" driver careens down the street just to and not exceeding the maximum traffic speed limit. Pedestrians see him a block away, and even if they have the right of way they hesitate to cross the street as the "perfect" driver speeds toward the crossing.

However, he makes a "perfect" stop just to and not beyond the danger line, breaking no traffic laws, but frightening pedestrians so that they fear to cross the street while they have a chance.

The "perfect" driver turns around corners with amazing accuracy and disagreeableness. He winds in and out of traffic with a skill that drives other motorists frantic. He is always immediately behind some automobile honing for them to speed up or get out of the way and passing them at the most inopportune moment.

The "perfect" driver is always right. He is so absolutely and recklessly right that other drivers and pedestrians fear him. He is the most disrupting element in the traffic situation.

The Origin of the Potato

A Native of Tropical and Sub-Tropical America

The potato is a native of elevated districts of tropical and sub-tropical America. It has been found growing wild in the Andes of South America, Mexico and the Rocky Mountain region of North America. The potato was cultivated and used as food long anterior to the discovery of America by Europeans. It seems to have been taken to Europe by the Spaniards.

In the 16th century, and spread from Spain into the Netherlands, Burgundy and Italy, but only to be cultivated in a few gardens as a curiosity toward the general use as a food.

It appears to have been taken to Ireland from Virginia by Hawkins in 1565; and to England by Sir Francis Drake in 1585, without attracting much notice, till it was a third time imported from America by Sir Walter Raleigh.

Compares Men To Chairs

All Can Be Sat On Says Woman Writer

"Men are like chairs," writes a woman in a foreign exchange, "they vary in shape and size but all can be sat on. Some men are like mahogany chairs, they lose their polish after a little while. Some are like Chippendale chairs, they need delicate handling. Some are like plush upholstered chairs, one cannot stand them on a hot day. Others are like parliamentary seats, they have to be won. Some married men are like deck chairs, they are always being dragged about. Some are like rocking chairs, they put you to sleep. And finally, some men are like benches, it takes more than one woman to sit on them."

A Good Old Flag

Dominions Resent Suggestion to Drop Union Jack As National Emblem

Small wonder that there is resentment in South Africa as there was in Canada at the suggestion that the Union Jack might be dropped as the national emblem. It's a good old flag is the Union Jack, and there's something akin to devotion and reverence in the thought of its flying, loved and unchallenged, in South Africa, Canada, India, in the heart of the empire and in the countless possessions that encircle the globe.—Stratford Beacon-Herald.

Related To Both

An Irishman was seated in a train beside a pompous individual, who had his dog with him.

"Fohie dog ye have," said the Irishman. "What kind is it?"

"A cross between an Irishman and an ape," said the man.

"Shure an' it's related to both us—'I'm Irish," said the Irishman.

"If a man marries a widow by the name of Elizabeth, with two small children, what does he get?"

"Give it up."

United States Has National Problem

Grave Danger of Food Famine Is Pointed Out

The American farmers' combined capital has shrunk \$6,000,000,000 in five years, Frank O. Lowden, former governor of Illinois and a presidential possibility, told the National Farm School conference at New York. Agriculture must be considered a national problem, he declared.

"In 50 years, a point of saturation, as regards population, will have been reached in the United States," Lowden predicted. "There is grave danger of repeated food famines unless steps are now taken to improve the quality of agriculture by making it more scientific and productive."

He cited figures tending to show that this condition would obtain not only in the United States, but in every other country.

"We could not hope to receive agricultural imports from other countries when the situation reverses itself," he said, "and we had become a nation consuming more than we could produce."

Quoting from a department of agriculture publication, Lowden referred to 1924 as a better year for the farmer than any of the preceding four years. "Yet after a wage allowance of less than common labor receives in other industries, his net return upon capital was 3.6 per cent., without deduction for depreciation of machinery or depletion of the soil."

Combined farmers' capital declined from \$37,000,000,000 in 1919 to \$32,000,000,000 in 1925, he said.

Performing Animals Depend On Music

Plays Important Part In Success Of Their Act

Music plays a very important part in the success of the performances by animals. This is illustrated by the story of a performing goat. Spreading a carpet on the ground, the keeper placed four blocks of wood about six inches high at a small distance apart, and on these the goat stepped, carefully setting each hoof on a block. Taking a small reed instrument, the man began to play an air, which was evidently liked by the goat, for he picked up his ears and seemed to listen with great attention.

Without a single mistake the goat lifted up each of the blocks, turned, and slipped under it another. This he repeated until the goat was gradually lifted and the pillars of wood were four feet from the ground, the patient animal all this time keeping its balance properly.

That the music was an important part of the performance is shown by the fact that when the keeper ceased playing the goat wavered and trembled, and directly the music went on his footing became steady again. When it finally stopped, the goat tottered, lost its balance, and jumped to the ground.

Mandarin Must Be Buried In China

Wealthy Merchant Died Four Years Ago In Vancouver and Body Still Unburied

For nearly four years the body of Loo Gee Wing, formerly one of Vancouver Chinatown's wealthy merchants, has lain at the undertaker's parlors of Mann & Thomson awaiting burial. With the present state of political unrest in China it seems that Loo Gee Wing's body may have to wait many more years before burial is possible. Relatives fear that if the remains were forwarded to China they might be stolen by brigands enroute from the coast to the final resting place planned for them in the interior. But under no condition must the body of the old Chinese be buried in Canada.

Loo Gee Wing was not of the ordinary merchant class. He was a mandarin, and according to the customs of China's aristocracy, a mandarin must not be buried in a foreign land. This would be desecration, it is said, and would forever separate the spirit of the deceased from those of his ancestors.

Give Away Queen Mother's Possessions

Most of the contents of Queen Alexandra's private rooms at Marlborough House have been distributed to charitable institutions in accordance with the late Queen's wish. Her most cherished household goods, both at Sandringham and Marlborough House, have been sent to relatives and friends.

And Her Father Bit!

Her Father—"Laura is too young, I tell you! Far too young to even think of marriage! Do I understand that the ring you gave her is an engagement ring?"

Perceval—"Oh, no, sir. It's just a toothling rug, sir."

They're Off! The Crack Footballers

Here's the football team that represents England, just saying goodbye to the Old Country as they sail on the Canadian Pacific liner Empress of Scotland for Quebec. These boys are the star players from half a dozen of the best professional football teams in Great Britain who, having just completed their own season, are coming to show the people of Canada what football can be like. Among them are D. B. N. Jack, who kicked the winning goal for the Football Club won this year by Bolton Wanderers, and Joe Smith, Captain of the winning team, who received the cup at the hands of King George. Another player, H. Barkins,

is from the First Division championship team, Huddersfield Town, and none of the others are below the first rank.

They are going right across Canada over C.P.R. lines, from Montreal to Vancouver, and return, playing the best. Canada has to put up against them. They started at Montreal with a game on Victoria Day, and they return to Montreal for the final game July 14. In between they play at Toronto, Fort William, Winnipeg, Regina, Lethbridge, Calgary, Vancouver, Nanaimo, Victoria, Edmonton, Saskatoon, Winnipeg, Thimble and Toronto. The last games will be against picked star teams representing Ontario and Eastern Canada.

Very fine gates have been the rule so far in these games. Five thousand saw the first game in Montreal, which the visitors won 5-3 and similar crowds saw the games to Hamilton and Toronto. Favored with cold and therefore favorable weather at the outset of the tour the players were able to become acclimatized before they struck the heat of a Canadian summer in the west. The result was a tour that not only gave Camdlang a firsthand knowledge of a great game, played by experts, but also gave the traveling team a good time in a British Dominion new to the majority of them and encouraged the hope that these tours will be made a yearly affair in the future.

Strange, Romantic Love Adventures of the Happier you know

Joanna

by H. L. GATES

Copyright 1925 by H. L. GATES

Published by arrangement with First National Pictures, Inc.

THE STORY THUS FAR

Joanna, a pretty flapper shop girl is given, by an unknown man, a million dollars to spend as she wishes. Grateful, her employer, bears the message, more than this he will not tell her. She is not to know her benefactor nor his motives. She can learn nothing more from the banker, Eggleston, nor his man-about-town nephew who helps her write her first check and tells her that he intends to make love to her. Dazed by the undreamed of wealth, hurt because her friends and acquaintances will not believe in her she does some shopping and returning home, happy because of the afternoon of buying long wanted things, she finds Brandon, nephew to her banker, and John, her old-fashioned sweetheart, waiting for her.

CHAPTER VII.

A Shattered Dream

For one brief minute Joanna stood at the foot of the stairs, just outside the drawing room door. The eagerness, the exhilaration which had wrapped her face as in an aura, had gone out of it. She closed her eyes tightly, the gold of their over-plucked brows making thin, straight lines. She steadied herself with her hand against the newel post. All the doubts, the confusions, the mysteries and the stupendous wonders of the world before her had revolved in her own beauty, and in the glory of John's surprise, his ecstasies, all the questions he would ask her and she couldn't answer. They would plan; she would be glad with him over every thought of the future either of them could conjure up. There would be no more tempers and hispid quarrels; no more fighting at each other. This time, when he put his arms about her, and kissed her, she wouldn't be restless and wish that he'd take her out into the lights, as other boys did, and romp with her through the narcotic valleys of jazz.

That had been what she had looked forward to. Now, as she faced the door, with John just beyond, waiting for her, and with the other man, whose very manner toward her was like a caress, also waiting for her, a premonition stirred her nerves. She felt, somehow, that her fate, the fate that had been so strangely brewed for her by unknown hands, was in

THIS MOTHER GLAD DAUGHTER IS WELL

Mrs. Parks Tells How Lydia E. Pinkham's Vegetable Compound Restored Her Daughter's Health

Toronto, Ontario.—"My daughter is 16 now and has been an invalid ever since she was six months old and has been compelled to remain out of school the greater part of the time. We have tried different kinds of medicine, but none helped her much. I had taken Lydia E. Pinkham's Vegetable Compound when I was run-down, and it had helped me so much that I thought it might help her at this time. She has gained ever since she began taking it. She attends school every day now and goes skating and does other out-of-door sports. I recommend this medicine to any one who is run-down and nervous and weak."—Mrs. Parks, 106 Bond Street, Toronto, Ontario.

Lydia E. Pinkham's Vegetable Compound is a dependable medicine for young women's troubles. For sale by druggists everywhere. C

Arab Women Are Ignored

Men Returning From Journey Only Greet Male Friends

There is not the Canadian thrill of hubby's homecoming for the wife of the smiling and inscrutable Arab. The menfolk return from their sojourns with sober, nearly sad faces, kiss brothers and fathers and male friends on the cheek and with never a look at their women, solemnly stalk out of the station.

There is scarcely a peal of laughter, or expression of joy at reunion, and never a smile on the face of the Arabs one meets along the 300 miles of railway.

ident, watching with a barely restrained amusement. Joanna accused him:

"Invo you told him anything? Anything that I don't know?"

Brandon was surprised by this sudden attack. "Mr. Wilmore seemed to know when I came. That is all, I assure you. He will say that I but expressed the hope that whatever was behind your unprecedented good fortune it would bring you a great happiness."

John flashed a glance at Brandon, and then spoke to Joanna, his voice still cold. "Whatever there is for me to know, will have to come from you Jo. After awhile, perhaps!"

The arrogant dimples came back into the girl's chin. She thanked Brandon, in her self-conscious way, for his flowers. He took possession of her easily, and talked with her as if there were not a third person in the room. Once Joanna, remembering, turned her face, glowing again, to John, who sat, moodily in one of the big red chairs, but he only muttered his reply to Joanna's reply.

Brandon led her to talk about her clothes—the marvelous things she had bought during the afternoon. He understood how to talk about such things, she discovered. He complimented her upon her choice of the frock she had chosen to put on that evening.

"Really, you know, that is why I came this evening," he explained, smiling frankly at her. "I wondered what sort of a change you would make in yourself, in the first few hours of such excitement as must have been yours. It must be very wonderful, to a girl, especially a girl who has had so little, to suddenly feel the possession of money—and such unlimited money. If you've ever had dreams you may now proceed to make them come true. Can't you?"

Joanna considered a moment a frown across her brow.

"I can't escape the feeling that everything is not going to be right," she said. "It is foolish, I know. Perhaps that is because I can't believe things, yet." Unconsciously she glanced at John, and nodded ever so slightly, at him. He acknowledged the look with:

"The world is made up of things that are hard for some people to believe."

The red came into the girl's cheeks again, red that was deeper than the rouge, and her lips trembled anew. Brandon rose.

Meadow Larks Halt Train

Meadow larks have appeared in the vicinity of Glenwood City, Wis., in such numbers that the local Soo line freight train was obliged to stop a few miles west of there to avoid running over hundreds of the birds on the track.—Milwaukee Journal.

If a man loves a woman he will give up something for her sake, but if she loves him she won't ask it.

FACE DISFIGURED BY PIMPLES

Large, Hard and Red, Itched and Burned, Healed by Cuticura.

"I was troubled with pimples that broke out on my forehead. They were large, hard and red, and soon scattered over my face disfiguring it. The pimples festered and itched and burned causing me to scratch, which made them worse. The trouble lasted about two months."

"I read an advertisement for Cuticura Soap and Ointment and sent for a free sample. After using it I purchased more and now I am completely healed." (Signed) Miss Anna Molnar, R. F. D. 5, Box 55, Toledo, Ohio, Sept. 8, 1925.

Clear the pores of impurities by daily use of Cuticura Soap, with touches of Cuticura Ointment as needed to soothe and heal. Cuticura is fragrant and refreshing. Sample Each Free by Mail. Address: Canadian Depot: "Bioshops, Ltd., Montreal." Price, Soap 25c, Ointment 25c and 50c. Talcom 25c. Cuticura Shaving Stick 25c.

Giant Passenger Plane

Now Under Construction and Will Be Used For Transcontinental Service in U. S.

A giant aeroplane, multi-motored, and providing sleeping accommodations for thirty-five to forty passengers, is now under construction from designs of Anthony H. O. Fokker, Dutch aeroplane designer and builder. It was learned on the return of Mr. Fokker to New York recently.

Much secrecy has surrounded the construction of this latest type of aeroplane, but it is known that the preliminary work on it has been carried on at the Fokker factory in Amsterdam, Holland. The machine is designed primarily for flying in America, and may be used to inaugurate a transcontinental passenger service between New York and San Francisco.

The fuselage of the plane, according to the present design, is built in two sections, the upper section being made over into sleeping berths at night, very similar to the berths now used in sleeping cars of the Pullman Company. The lower section will be equipped with seats as in a railroad parlor car. The plane will be comparable in conveniences to any first-class sleeping train. No date has been set for its completion, as several alterations in design have interrupted its building schedule.

A PERFECT MEDICINE FOR LITTLE ONES

Baby's Own Tablets Should be in Every Home Where There Are Children

The perfect medicine for little ones is found in Baby's Own Tablets. They are a gentle but thorough laxative which regulate the bowels, sweeten the stomach, drive out constipation and indigestion; break up colds and simple fevers and promote beautiful refreshing sleep. It is impossible for Baby's Own Tablets to harm even the new-born babe, as they are absolutely guaranteed free from opiates or any other injurious drug.

Concerning the Tablets, Mrs. Alex. J. Perry, Atlantic, N.S., writes: "I always keep Baby's Own Tablets in the house for the children, as I have found them a perfect medicine for little ones."

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Little helps for this week

Pray without ceasing.—I. Thess. v., 17.

More things are wrought by prayer than this world dreams of. Wherefore let thy voice rise like a fountain for me night and day.

For what are men better than sheep or goats.

That would wish a blind life within the brain.

If knowing God, they lift not hands in prayer.

Both for themselves and those who call them friend?

For so the whole round world is every way

Bound by gold chains about the feet of God.

—Alfred Tennyson.

Prayer is the door forever open between earth and heaven. Sooner than sound can reach a human ear through this lower atmosphere, the longing desire of the spirit rises to the heart of the Eternal Friend. Whether we believe it or not, we are living in an invisible world, where our wishes are understood before our words are spoken.—Lucy Larcom.

No Rest With Asthma. Asthma usually attacks at night, the one time when rest is needed most. Hence the loss of strength, the nervous debility, the loss of flesh and other evils which must be expected unless relief is secured. Fortunately relief is possible. Dr. J. D. Kellogg's Asthma Remedy has proved its merits through years of service. A trial will surely convince you.

Peculiar Auto Accidents

Gilbert Babcock, 20 years of age, of Middletown, N.Y., has sustained one of the most remarkable auto accidents ever known. He was thrown from his car and struck against a tree, fracturing his Adam's apple. It is feared he will never be able to speak again, although he will live.

Use Minard's Liniment in the stables

The ministers of agriculture for the six states of the Australian Commonwealth are meeting in June to discuss Australian participation in the World's Poultry Congress. Australia has taken a prominent place in poultry activity, and her laying tests are world renowned.

Two of a Kind

Mr. I'll have to let some bills go this month—our grocery bill is something fierce.

Mrs.—Yes, dear, and so is the grocer.

Minard's Liniment King of Pain

Discoverer of the "Amperes"

Name of French Mathematician Given To Electric Unit

In this electrically-driven age one talks glibly of "amperes," "amperemeters," "amperage." How many people know how these terms originated? In the centre of a tiny square in the ancient Perrache district section of Lyons, France, is the monument to Marie Andre Ampere, the great physicist and mathematician, whose name has been given to the electric unit in acknowledgment of his many notable discoveries.

Walking along the Rue Victor Hugo one comes upon it quite unexpectedly. The figure of the famous scientist rests in a huge chair.

Ampere's mathematical genius was evidenced when he was a mere infant. It is said that with pebbles and bread crumbs he worked out complicated and elaborate arithmetical problems before he even knew the figures by sight.

He is reputed to have said that he knew as much about mathematics at 15 as he did in the later years of his life. Quite a startling statement when one recalls him as one of the chiefest authorities on mathematics in the nineteenth century.

Ampere's most important contributions to science were the establishment of the relations between electricity and magnetism and the development of the science of electro-magnetism, which followed. He wrote many interesting works on other subjects. Among them was a short treatise on gambling. In this he applied the theories of mathematics to prove that the odds were against the man who engaged in gambling habitually.

Celtic Calendar Deciphered

Months Spent in Reproducing Fragments Found Years Ago

The Celtic calendar composed of 200 bronze fragments discovered some years ago at Coligny in the Ain Department of France have at last been deciphered by French scientists. Expert archaeologists spent months in cleaning and reproducing the fragments and a full plate was made by electroplating, which permitted the interpretation of the signs. It is revealed that the Celtic year was composed of 355 days, with the months alternately thirty and twenty-nine days. Every two and a half years an extra month was inserted to catch up with the solar year.

Mifflin's Worm Powders are complete in themselves. They not only drive worms from the system, but repair the damage that worms cause and so invigorate the constitution that it speeds recovery from the disorders of the digestion that are the result of the work of these parasitic intruders. They do their work thoroughly and strength and soundness follow their use.

Lesson Is Obvious

Canadians Should Use Money To Develop Rich Resources

Our universities seem to be engaged very largely in training men for the benefit of the United States, and the men from that country are also enough to be using the resources of Canada for their own advantage. The lesson seems obvious. It is that Canadian should not sit so lightly on their money, but venture some of it not only in mining, but in industries of various descriptions. It is no use, and it is not fair, to complain of graduates and others leaving Canada when good opportunities do not offer themselves here. Canadians have the money and they have the finest resources in the world; to build up a prosperous country they should use the first in developing the second.—Kingston Standard.

Epidemics Take Huge Toll

Epidemics, with a toll of 40,000,000 have claimed more lives throughout the world since 1914 than all the wars and civil strife since that year, the second Pan-American Red Cross conference was told by T. B. Kitteridge, assistant director-general of the League of Red Cross Societies.

Would Take Aerial Survey Of Canada

Air Surveys Company, of London, Asking Permission

Col. C. R. Ryder, C.B., C.I.S., D.S.O., recently arrived in this country on his way to Ottawa and afterwards to the capitals of the various provinces to interview the heads of the Federal and Provincial Governments relative to the possibility of allowing his firm, the Air Surveys Company, London, to make a complete aerial survey of the whole of Canada.

For Sprains and Bruises.—There is nothing better for sprains and contusions than Dr. Thomas' Eclectic Oil. It will reduce the swelling that follows a sprain, will cool the inflamed flesh and draw the pain. It will take the ache out of a bruise by counteracting the inflammation. A trial will convince any who doubt its power.

A Woman Railroad President

Mrs. Sarah Drain Denborn, of New Orleans, who is in the seventies, is railroad president. She has succeeded her husband as head of the Louisiana Railway and Navigation Company. Founder of the steel wire industry and a partner of John W. Gates. He died recently a multimillionaire.

She Could Hardly Do Her Housework Nerves Were So Bad

Mrs. I. M. Parks, Concession, Ont., writes: "I had heart and nerve trouble, and became so short of breath I could hardly do my daily housework, and was so nervous I could not think of anything alone, as every little sound I heard felt like a shock to me."

I Saw

recommended, so I tried a box, and after taking the second one I am now feeling like a different woman."

This preparation has been on the market for the past 32 years and has achieved a wonderful reputation for the relief of all heart and nerve troubles.

Put up only by The T. Milburn Co., Limited, Toronto, Ont.

Aeroplanes Had Busy Year
More than 2,600 passengers were carried in the past year by the five privately operated aeroplane lines in Australia.

Keeps Food Fresh and Full Flavored

After each meal cover your bread, cake, meat and other left-overs with Para Sani. This heavy waxed paper protects your food from drying out and saves much that would otherwise be thrown out.

Para Sani is sold in a most convenient package. From the large cardboard box you tear off the exact amount of paper you want. No paper wasted—no time lost.

Ask your dealer for Para Sani, or write direct to

Newcomers to Local Factory Staff

Newcomers to the staff of the local sugar factory are:

Mr. and Mrs. Cornaby, who will reside in the company home located on first east street. They come to Raymond from the Elsinore sugar factory. Mr. Cornaby has been with the sugar company for several years. He will act as assistant master mechanic here.

Mr. and Mrs. Jack O'Bryant and three children, who will occupy the S. F. Kimball residence. They hail from sugar city, Idaho. Mr. O'Bryant has been in the service of the sugar company for several years at sugar city and Garland. He will hold the position of general foreman here.

Mr. and Mrs. R. A. Carlson, and son Bobby, who will reside in the Rasmussen home. Mr. Carlson has worked in several of the company's large plants and has been with the company since 1903. He will be foreman here.

Reg. Gaddies, who comes from Idaho Falls, will act as chief chemist here.

Mr. and Mrs. Deal, from Salt Lake, will occupy Mrs. Redd's home. Mr. Deal is an electrician of wide experience and will act in that capacity here.

All of the above men are specially trained in sugar house control, and will tend to give the Raymond factory a strong force of reliable men. All of our new citizens express themselves as delighted with Canada and find conditions much better than they expected. Raymond welcomes them.

Dr. H. Harcourt Heal left last Monday for Chicago where he will take a post graduate course in dentistry. He will be absent for at least the summer months. His brother, Herb, has taken over his practice here.

Mrs. Ray Knight, sons Wayne and Jesse, and their two chimps arrived here for a visit from Salt Lake City last Saturday.

Spend Dominion Day in Raymond and help the boy scouts make a real celebration.

FOR SALE—Fresh cow, H. P. Schneider, 3 miles north-east of Raymond.

You must see "Winds of Chance" at the Rex tonight and Saturday. It is truly an epic of the frozen north.

FOR SALE—10 acres of standing hay. McCormick Mower and Hase Rake, Buggy, Harness, Cream Separator, Oil Stove with Oven. E. Weed, phone 52.

NOTICE

I have in Pound one red, white yearling heifer. No mark or brand. Impounded June 16, 1926. If not claimed and paid for will be sold at the stray pound, Raymond, June 26, 1926, at 6 p. m.

Vote 1 For L. Peterson

In voting for a candidate the elector should exercise the same care as he would in engaging a manager for his business. The main question should be, "What are his qualifications, and his record?" You judge a prospective employee, not on what he promises to do, but what he has done.

The Liberals have a record of sixteen years of office in this province. This record they do not and cannot defend. The public, however, has not forgotten it.

The Conservatives have no record at all. Their return, that of the Liberals, would mean a return to the party system, and all that it implies.

The U.F.A. ask for your vote on June 28 on their record for the past five years. They offer a continuation of sound business administration for the benefit of the people of Alberta as a whole, and co-operation instead of party division.

The only argument the Liberals and Conservatives offer is that of promises. The Government's argument is performance. During the past five years the cost of administration has been reduced 14 per cent., the Civil Service has been transferred from a basis of patronage to a basis of merit, a real highway policy has been put into effect, health and education services have been increased, etc. Efficiency is much greater in every department of government as a result of transference from a basis of party favoritism to one of business administration.

The government have had to face the opposition of the daily press, they have had to shoulder the legacies of railways, irrigation schemes, cow bill, seed and feed relief payments, etc., responsible for our present debt. They have had to face the inaction of the Liberal Government in Ottawa with regard to natural resources, railway and colonization responsibility, provincial control of power and mineral development, etc. But despite these handicaps they have made remarkable progress.

Note the improvement since 1911.

Issued by the U. F. A. Publicity Committee, Calgary

Here Is What "The U.F.A."

The Official Organ For the Province

Had to Say of Capt. Shaw

Liberal Leader, As Late As Sept. 15, 1925

CAPTAIN SHAW

CAPT. J. T. SHAW

"The announcement that Captain Shaw, who has represented West Calgary in the House of Commons as an Independent member for the past four years, will not be a candidate in the forthcoming election will be received with the deepest regret, not only in all parts of Alberta but among forward-looking people throughout the Dominion

"Capt. Shaw's withdrawal from public life would be a very serious loss to Canada. He made his mark in the last parliament, and he is recognized today as a parliamentarian of independent spirit and of outstanding ability and courage. He is one of a still small group of men in the federal sphere who have been paving the way for a real advance from the petty personal politics of today, to constructive and genuinely progressive statesmanship. His early return to public life will be hoped for by all who are familiar with his record of service in the parliament recently dissolved.

"Since the announcement of Mr. Shaw's intention not to be a candidate very great pressure has been brought to bear upon him in Calgary in the hope that he will reconsider his position. We trust that he may yet decide to allow his name to go before the electors on October 29th."

Mark Your Ballot Through

Do not be satisfied with marking No. 1 for your own party, but mark your second choice of the other two candidates

Marking Your Second Choice

In no way interferes with your first choice. Your first choice is not eliminated unless your candidate is the low man. If you "plump" for one candidate, it means merely that you make no second choice of the other two, if your candidate should be eliminated.

Vote 1 For The Liberal Candidate

If you have determined to vote No. for another candidate, then vote No. 2 for the Liberal Candidate

Conservative Principles Are Restated By
The Conservative Leader

A. A. McGillivray Sets Forth in Plain Language What the Provincial Conservative Party Stands for in Coming General Election

Co-operative Marketing Extension is Advocated

Proportion of Moneys Expended on Roads to Go Toward Maintenance of Country Roads as Well as Main Highways—Encourage the Inflow of Capital and Immigration to Supplement Efforts of Dominion Government

SPEAKING at Rockyford on Thursday afternoon, June 18th, in support of Hugh Milder, Conservative candidate in the Gleichen riding, A. A. McGillivray, leader of the provincial Conservative party, restated the items in the policy of the party that he has stated from different platforms in Alberta since being elected leader in August, 1927.

In his usual fighting style, Mr. McGillivray reviewed the record of the old liberal administrations and the record of the present government. Summing up his appeal to the electorate following the declaration of political principles, Mr. McGillivray said the liberal party cannot go back into power and its record cannot be hidden under the cloak of one new convert.

GIVE THEM CHANCE

The present government has failed to cope with public questions, the chief of which are redistribution, the northern railways, natural resources and the finance problem that it has had to face, then why not give the provincial Conservative party a chance to demonstrate what it can do? Mr. McGillivray left here at 8 p. m. for Oyen and other points in the Aradia riding.

In reiterating points in the conservative policy that have been enunciated by him from many platforms since he took the leadership of the party in August, 1925, Mr. McGillivray said: "I have not gone in for the form of political advertising that is known as the manifesto. I observe that the Liberal leader leaned toward them in 1921. He issued one which commenced as follows: 'Fence representative government to replace the party system. Independent candidate in west Calgary outlines constructive proposals for the establishment of a democratic government freed from partisanship and partyism. Proportionate representation truly reflects popular will. Patronage system which is vital to the maintenance of party system, and is today a national scandal, will disappear under the reformed method of election.'"

"In so much as the new manifesto of the Liberal leader commenced as follows:

"Liberal manifesto—J. T. Shaw, Liberal leader, issues statement of party policy, and in so much as this latest manifesto by Mr. Shaw, in so far as it does not consist of copy-book platitudes and glittering generalities, is partly taken from the pronouncements of the Conservative party, it may be

well for me to restate the position of the provincial conservative party upon some of the provincial issues, a position taken and given public expression to on the platforms of this country at times when Mr. Shaw was still an Independent.

CONSERVATIVE PLATFORM.

"The provincial Conservative party stands for the following:

"1. Redistribution whereby the number of constituencies will be reduced so that there will not be more than 45 members in the legislature. This reduction to be made having due regard to population and to the sparsely settled areas.

"2. Reduction in the amount paid as sessional indemnities of members by \$500.

"3. A determined effort to make of the United Farmers of Alberta organization something more than a mere political machine and to advance its development along social and economic lines.

"The encouragement of co-operative marketing. Even as supporters of the Conservative party brought Sapirco to Alberta without thought of political advantage, so will the Conservative party support any movement for the benefit of the farmers without seeking political glorification.

MONEY FOR ROADS

"5. A fair proportion of the moneys expended on roads being deflected from spectacular trunk roads to farmer's market roads.

"In so far as it lies within the legislative control of the province keeping check over grain elevators with respect to weighing and grading of grain.

"7. A real soil survey of the drought areas of the south by the greatest agriculturists available.

"8. Putting our provincial telephone system on a business basis.

"9. Furthering any practical scheme providing for rural credits.

"10. Equality of men and women under the law.

"11. A recognition of the fact that labor unions are as much an essential product of modern economic life as are the large corporations and that they tend to bring

about equality in wage bargaining that would not exist if the individual had to bargain with the great corporations.

RIGHT OF APPEAL

"12. Providing a right of appeal under the Workmen's Compensation Act from an autocratic compensation board.

"13. Raising the scale of compensation for railwaymen in non-negligence cases to the level enjoyed other by classes of workmen.

"14. Equitable distribution of the burden of taxation for upkeep of the schools.

"15. A most careful consideration of all possible ways and means for providing security of tenure and a practical pension scheme for teachers.

"16. An examination of the school courses by education technician with a view to making certain that our student body is not faced with an overloaded curriculum.

"17. Revaluation and sale on the proper terms of the E.D. and B.C. and Central Canadian railways, with a consequent savings of nearly one million dollars a year.

"18. The obtaining of our natural resources on fair and equitable terms without any school or other strings attached thereto. (The provincial Conservative party have stood for this since 1905.)

BALANCING THE BUDGET

"19. The yearly balancing of the budget. In September, 1925, while advocates of this government were still saying that it could not be done without injuring essential services, the Conservative took the position, as it does now, that the budget could and should be balanced in each year.

"20. A complete reversal of the former Liberal and present government's attitude toward capital by encouraging in every possible way those who have money to invest in the exploration and utilization of our natural resources of all kinds.

"21. A provincial immigration and colonization policy to supplement the efforts of the Dominion government to get people and to retain them when we get them here, so that with more people among whom to distribute the load we may hope to cope with our debt and our ever increasing burden of taxation. The provincial Conservative party is determined to bring about an inflow of capital and people, because the future prosperity of our people is inseparably associated with these.

"22. One system of voting for both city and rural constituencies.

"23. An immediate decision as to the Spray Lakes water power project.

"24. More local autonomy in municipal affairs.,

(Issued by Provincial Conservative Association.)
